Cam & Lifter Installation Lube

Initial start-up is the most critical time in the life of any new camshaft. COMP Cams® has taken great pains to develop what we feel is the best protective break-in lubricant on the market. It must be spread generously on all lobes of the cam, on the faces of the lifters and on the distributor gear when installing a cam. This is the instant protection you need to guard against any premature wear.

Part #	Description	Size
103*	Cam & Lifter Installation Lube	5/8 fl. oz.
152	Cam & Lifter Installation Lube	4 oz. bottle
153	Cam & Lifter Installation Lube	8 oz. bottle
198	6-Pack (Contains 6 of Part #152)	4 oz. bottles

MSDS available on request

* As supplied with every camshaft

Engine Assembly Lube

Our engine assembly lube is the choice of professional engine builders for its superior lubricating properties and its exceptional ability to adhere to internal engine parts until start-up. This white lithium base lubricant is ideal for the ball-socket area of rocker arms and removes with soap and water for easy clean-up.

Part #	Description	Size
102	Engine Assembly Lube	4 oz. jar
104	Engine Assembly Lube	8 oz. jar
127	Engine Assembly Lube	16 oz. tube
